Professional experience:

2015 - 2024 - **DOCK BRAS SHIPYARDS LTDA**

• Crane Operator

- Responsible for using the crane controls to lift, transport and position the load with precision and care, avoiding damage to the load and equipment.
- Loading and unloading materials for vessel repairs and efficient management of the flow of materials, ensuring delivery to the location at the right time.
- Strategic planning of cargo handling and market studies to identify the best transportation and logistics options to achieve the best cost-benefit ratio. Crane operation, cargo support and maintenance, and transportation of cargo and tools.
- Perform preventive maintenance of equipment to maintain equipment safety and improve development in the work area.
- Raise awareness among the team about risks and occupational safety procedures through the use of safety equipment, lanyards and personal protective equipment (PPE).
- Assess operating conditions of machines and equipment through daily inspections and daily completion of the Checklist and other necessary documents involving the operation, such as: DDS, APT, APR and others, as per the standard.

2014 - 2015 - **DOCK BRAS SHIPYARDS LTDA**

• Signal Rigger

- Responsible for carrying out traffic diversion and guidance activities and cargo movement in accordance with safety standards.
- Supporting lifting, unloading and handling of cargo. Checking whether the cargo is correctly secured and stabilized, using appropriate lashing equipment.
- Communicating with the crane operator to ensure the best possible operation. Issuing audio and visual alerts for any risky situation to interrupt the operation and prevent accidents. Recording details of the operation, such as weight of the cargo, type of equipment used and name of the operator, for control and safety purposes.
- Carrying out inspections in the area, removing obstacles that prevent the equipment from being placed or maneuvered. Providing support for maneuvers and entry and exit of cranes, forklifts, forklifts and mobile gantries.

2012 - 2014 - **DOCK BRAS SHIPYARDS LTDA**

• Esmerilhador

- Responsible for accompanying the welder to prepare and set up the work site. Use of the angle grinder to grind, sand and cut metals. Clean, mark and position the piece correctly on the grinder. Follow all work safety standards to prevent accidents. Choose the correct sanding, grinding or cutting disc for the material and the task to be performed.
